

CLASS A2 ALUMINIUM DECKING FOR BALCONIES

Blend Composite's Proactive 600 Aluminium decking is the ultimate non combustible A2 fire rated aluminium decking that is suitable for all balconies and terraces with a steel beam or an aluminium supporting system.

The beautifully engineered boards made from high grade T6 aluminium make them an easy choice for new builds or refurbishment projects that need to comply with the latest fire safety regulations. The Proactive 600 is a low profile board designed to be installed without the use of clips ensures a very cost effective and easy installation that saves on time and labour costs. Developed and designed with an integral water collection system that allows water runoff to be channelled into the building's rainwater system. Aesthetically pleasing the A2 fire rated aluminium decking is also suited for offsite manufacturing, it comes with a 25 year warranty and is your premier choice for non combustible decking.
